International CES / T.H.E. Show 2007 Report

Bonus Coverage By Dick Olsher

From Hong Kong we have interesting new ESL technology. Shown here is the King's Audio Emperor (\$32,000/pr), a three-panel affair that is available in a variety of artwork. However, the product line comprises many other models (www.kingsaudio.com.hk). The large radiating area is built up using an array of small cells to ensure uniform tolerances and performance and allows the use of an extremely thin diaphragm.
