Vegas07 Chameleon Speakers: King Sound

by Josh Ray

Shock your friends and family with the new KingSound **Emperors!** Just imagine the looks on their faces when you reveal that your new Asian-themed room dividers are actually \$32,000 electrostatic panels from China! Ah, yes, good times...

So how'd they sound? Big. Really big. See that EXIT sign high up on the wall? That's where the voices were coming from. KingSound has an entire lineup of similarly stealthy speakers and are looking for retailers far and wide to pick up their products.
